Hi Megan – I've been told that I have to notify ACHP about the potential for an adverse effect and to document how we got to the conclusion that a PSPA is needed. Then they have 15 days to respond. It'll be good to schedule that conf call with Curtis sooner rather than later I think...

Mary Beth,

I have not contacted anyone at ACHP yet. I asked SHPO about this and they felt it was not necessary to loop them in until the PSPA was drafted or unless there were major issues regarding impacts or unless the consulting parties had major objections.

Thank you,

Megan

I forgot, I have one more question – have you been in contact with anyone at ACHP yet? I was given a name – Christopher Wilson – to cc on the lead federal agency letter, but will change that if needed.

Mary Beth,

I'm just wondering, are you contacting the tribes for the 106 coordination aspect of the dam removal, or was there another reason? If it's for 106, as you can see from the response I sent you, I've contacted them already so you wouldn't have to do that. I've remained in contact with all of the organizations who expressed any kind of interest in the removal of the dam as part of the 106 coordination process for the project. I just wanted to make that clear so that you aren't doing unnecessary work!

Thank you,

Megan

**Subject:** RE: Gorge cultural resources questions

Mary Beth,

I contacted all of the tribes who are recognized as having an historical interest in Ohio and asked if they wanted to be consulting parties. I also contacted any historical societies or organizations which might have an interest in the history of the Gorge/Cascade Valley areas. Everyone who indicated interest in being a consulting party is listed below. I sent the entirety of the cultural resources coordination submission (i.e. everything I sent to SHPO) to anyone who expressed interest, no matter how vague, in being a consulting party. I got one formal response: Bill Hunter from the Cuyahoga Valley National Park sent a letter concurring with our findings and expressing support and interest in the development of the programmatic agreement. The only other substantive comments I received regarding the project were from Dr. Joe Stahlman, who is the new THPO for the Seneca Nation and Dr. Brice Obermeyer, the Director of Historic Preservation for the Delaware Tribe of Indians. Dr. Stahlman expressed concern about potential unexpected prehistoric finds during the project. Dr. Obermeyer's comments were similar, and he noted that the Delaware had a large village site somewhere in the Cuyahoga Falls area at one time, likely near the Gorge. Neither followed up with formalized comments, but regardless we will of course take surprise discoveries, prehistoric or historic, into account in the coordination document.

I will be sending the concurrence letter from SHPO out to the people listed below for their records. Once we have drafted the programmatic agreement, I will reach out again to these consulting parties and invite commentary.

If needed, I can provide the full list of individuals/organizations/tribes we invited to comment on the project. Let me know if you have any other questions!

Thank you!

Megan

Here are the groups that told us they wanted to be consulting parties on the cultural resources coordination for the project:

**Subject:** Gorge cultural resources questions

Hi Megan,

I know that we are working with a number of stakeholders on the Gorge Dam removal project, but are any of them considered “consulting parties?” You didn’t cc anybody in your letter to SHPO and the meeting minutes from a conference call with SHPO that you shared only included SMP and SHPO, so I’m assuming that there are no consulting parties at this time. Is that correct?

Also, have you been in contact with any tribes about this project? EPA is working on a letter to the tribes and pulling together a contact list. If you have any info regarding tribal interests in the project area, please let me know.

Thanks,

-Mary Beth
